<b>pOVT79 – Incense Tree (<i>Aquilaria sinensis</i>)</b>				
<b>BASIS OF NOMINATION:</b> Tree of rare and precious species				
<b>SPECIES: [native]</b> <i>Aquilaria sinensis</i> Incense Tree 土沉香				
<b>LOCATION:</b> North District. Former HK Golf Club Old Course. <b>Woodland Tree</b> Northing: 830136.7 Easting: 838955.9				
<b>AGE:</b> Estimated at least 30 years.				
<b>DIMENSIONS:</b> DBH: 375mm Height: 12m Spread: 6m				
<b>TREE CONDITION:</b>	<b>Form:</b> Good	<b>Health:</b> Good	<b>Structure:</b> Good	<b>Amenity:</b> High
<b>CONSERVATION STATUS:</b>		Protected under Cap 586. Listed as 'Near Threatened' in Rare and Precious Plants of Hong Kong. Listed as 'Vulnerable' in China Plant Red Data Book. Listed as 'Vulnerable' under criteria A2a in IUCN Red List of Threatened Species.		
<b>SPECIAL FEATURES:</b> A tree that is of protected, rare and precious species, located alongside the access road to On Po village, just south of the gate at the access road crossing point between the fourth and fifth holes of the Old Course. The tree rises above the surrounding vegetation and, together with the adjacent pOVT79A, serves to greet golfers travelling from hole 4 to hole 5. As with other Incense trees, this tree is protected under Cap 586, listed as 'Near Threatened' in Rare and Precious Plants of Hong Kong, listed as 'Vulnerable' in the China Plant Red Data Book, and listed as 'Vulnerable' under criteria A2a in the IUCN Red List of Threatened Species. The tree is designated as a Heritage Tree (HT012) in Prof. CY Jim's "Evaluation and Valuation of Heritage Trees in the HKGC Fanling Site: Old Course" (2020) due to its protected status, with a monetary value (in 2020) of HK\$7.7M.				
<b>COMPARISON WITH EXISTING OVTS OF THIS SPECIES ON THE REGISTER:</b> The OVT Register currently has only 1 <i>Aquilaria sinensis</i> registered as OVT. The dimensions of that tree are 760mm DBH, 12m height, 6m spread. While the DBH of pOVT79 is smaller, it has comparable height and spread and it will make a good addition to the OVT Register as a representative of this protected species.

pOVT79A (View 3)

<b>pOVT80 - Camphor Tree (<i>Cinnamomum camphora</i>)</b>				
<b>BASIS OF NOMINATION:</b> Tree of cultural significance Tree of outstanding form				
<b>SPECIES: [native]</b> <i>Cinnamomum camphora</i> Camphor Tree 樟				
<b>LOCATION:</b> North District. Former HK Golf Club Old Course. <b>Woodland Tree</b> Northing: 838938.1 Easting: 830138.7				
<b>AGE:</b> Estimated at least 70 years.				
<b>DIMENSIONS:</b> DBH: 990mm Height: 15.5m Spread: 18.0m				
<b>TREE CONDITION:</b>	<b>Form:</b> Good	<b>Health:</b> Good	<b>Structure:</b> Good	<b>Amenity:</b> High
<b>SPECIAL FEATURES:</b> A large and beautiful old woodland tree of outstanding size and form, located at the tee box of the fifth hole on the Old Course near the access road from Fan Kam Road to On Po village (Views 4 & 5). An outstanding old tree providing valuable contributions for landscape amenity, cultural and heritage values, functional values and ecological value. Located at the fifth hole tee box, pOVT80 provides a visual landmark in the visual framing of the fifth hole, and thus it makes a significant contribution to the cultural heritage landscape of the oldest golf course in Asia, which is under consideration for a UNESCO Asia-Pacific Award for Cultural Heritage Conservation.				
<b>COMPARISON WITH EXISTING OVTS OF THIS SPECIES ON THE REGISTER:</b> The OVT Register currently has 44 <i>Cinnamomum camphora</i> registered as OVTS. The DBH of those trees ranges from 700mm to 3007mm DBH, with heights from 10m to 27m and crown spreads from 13m to 35m. The dimensions of pOVT80 are comparable with those OVTS. pOVT80 will be an excellent addition to the Register as a beautiful individual specimen of the species as well as a contributor to this important cultural heritage landscape.

<b>SPECIES: [native]</b> <i>Cinnamomum camphora</i> Camphor Tree 樟				
<b>LOCATION:</b> North District. Former HK Golf Club Old Course. <b>Woodland Tree</b> Northing: 838926.2 Easting: 830163.7				
<b>AGE:</b> Estimated at least 70 years.				
<b>DIMENSIONS:</b> DBH: 785mm Height: 13.5m Spread: 19.0m				
<b>TREE CONDITION:</b>	<b>Form:</b> Good	<b>Health:</b> Good	<b>Structure:</b> Good	<b>Amenity:</b> High
<b>SPECIAL FEATURES:</b> A large and beautiful old woodland tree of outstanding size and form, located between the tee box of the fifth hole on the Old Course and the access road from Fan Kam Road to On Po Tsuen village (View 3). An outstanding old tree providing valuable contributions for landscape amenity, cultural and heritage values, functional values and ecological value. Located at the fifth hole tee box, pOVT81 provides a visual framing of the fifth hole tee box area, and thus makes a contribution to the cultural heritage landscape of the oldest golf course in Asia, which is under consideration for a UNESCO Asia-Pacific Award for Cultural Heritage Conservation. In addition, being located along, and providing shade to, the access road into On Po village (View 1), pOVT81 has some Fung Shui significance for the villagers.				
<b>COMPARISON WITH EXISTING OVTS OF THIS SPECIES ON THE REGISTER:</b> The OVT Register currently has 44 <i>Cinnamomum camphora</i> registered as OVTS. The DBH of those trees ranges from 700mm to 3007mm DBH, with heights from 10m to 27m and crown spreads from 13m to 35m. The dimensions of pOVT81 are comparable with those existing OVTS. pOVT81 will be an excellent addition to the Register as a beautiful individual specimen as well as a contributor to this important cultural heritage landscape and as a tree with some Fung Shui significance.

**pOVT82 - Paper-bark Tree (*Melaleuca cajuputi* subsp. *cumingiana*)**

**BASIS OF NOMINATION:**  
 Large Dimension  $\geq 1000\text{mm}$  DBH  
 Tree of cultural significance  
 Tree of outstanding form

**SPECIES: [exotic]**  
*Melaleuca cajuputi* subsp. *cumingiana*  
 Paper-bark Tree  
 白千層

**LOCATION:**  
 North District.  
 Former HK Golf Club Old Course.  
**Parkland Tree**  
 Northing: 838926.2  
 Easting: 830118.7

**AGE:**  
 Estimated at least 70 years.

**DIMENSIONS:**  
 DBH: 1055mm  
 Height: 23.0m  
 Spread: 11.0m

<b>TREE CONDITION:</b>	<b>Form:</b> Good	<b>Health:</b> Good	<b>Structure:</b> Good	<b>Amenity:</b> High
------------------------	-------------------	---------------------	------------------------	----------------------

**SPECIAL FEATURES:**

A very large and unusual parkland tree located at the fifth hole tee box of the Old Course, where it is a prominent feature providing a valuable contribution to visual amenity. The tree has unusual form and structure with 3 large stems and several suckers. Arguably one of the best and largest specimens of this species in Hong Kong it is a landmark tree and makes a significant contribution to the cultural heritage landscape of the oldest golf course in Asia, which is under consideration for a UNESCO Asia-Pacific Award for Cultural Heritage Conservation. The tree displays an interesting helical bark feature as a result of the phenomenon called spiral grain, which acts to provide uniform distribution of supplies between roots and branches, and makes trunks and branches more resistant to damage from strong wind. Spiral grain is important for pOVT82 to thrive given the tree is located on the woodland edge with competition for resources from other woodland trees and shrubs.

**COMPARISON WITH EXISTING OVTS OF THIS SPECIES ON THE REGISTER:**

The OVT Register currently has 12 *Melaleuca cajuputi* subsp. *cumingiana* registered as OVTs. The DBH of those *Melaleuca cajuputi* subsp. *cumingiana* ranges from 700mm to 1565mm, with heights from 9m to 21m and crown spreads from 6m to 13m. The DBH and spread of pOVT82 are comparable with those existing OVTs, however it is taller than them. pOVT82 will be a good addition to the Register as an outstanding individual specimen and as a contributor to this important cultural heritage landscape.

<b>pOVT82A – Incense Tree (<i>Aquilaria sinensis</i>)</b>				
<b>BASIS OF NOMINATION:</b> Tree of rare and precious species				
<b>SPECIES: [native]</b> <i>Aquilaria sinensis</i> Incense Tree 土沉香				
<b>LOCATION:</b> North District. Former HK Golf Club Old Course. <b>Woodland Tree</b> Northing: 830166.6 Easting: 838897.3				
<b>AGE:</b> Estimated at least 30 years.				
<b>DIMENSIONS:</b> DBH: 385mm Height: 14.5m Spread: 9m				
<b>TREE CONDITION:</b>	<b>Form:</b> Average	<b>Health:</b> Good	<b>Structure:</b> Good	<b>Amenity:</b> High
<b>CONSERVATION STATUS:</b>		Protected under Cap 586. Listed as 'Near Threatened' in Rare and Precious Plants of Hong Kong. Listed as 'Vulnerable' in China Plant Red Data Book. Listed as 'Vulnerable' under criteria A2a in IUCN Red List of Threatened Species.		
<b>SPECIAL FEATURES:</b> An attractive woodland tree that is of protected, rare and precious species located near the fifth tee of the Old Course. The tree rises above the surrounding vegetation and therefore has a recognizable crown. The tree is slightly leaning with a slightly asymmetric crown most likely due to its adjacent larger <i>Melaleuca</i> tree, but development of reaction wood and buttress roots at trunk base (View 6) make the tree stable and its structure uncompromised. As with other Incense trees, this tree is protected under Cap 586, listed as 'Near Threatened' in Rare and Precious Plants of Hong Kong, listed as 'Vulnerable' in the China Plant Red Data Book, and listed as 'Vulnerable' under criteria A2a in the IUCN Red List of Threatened Species. The tree is designated as a Heritage Tree (HT044) in Prof. CY Jim's " <i>Evaluation and Valuation of Heritage Trees in the HKGC Fanling Site: Old Course</i> " (2020) due to its protected status, with a monetary value (in 2020) of HK\$7.7M.				
<b>COMPARISON WITH EXISTING OVTS OF THIS SPECIES ON THE REGISTER:</b> The OVT Register currently has only 1 <i>Aquilaria sinensis</i> registered as OVT. The dimensions of that tree are 760mm DBH, 12m height, 6m spread. While the DBH of pOVT82A is smaller, it is taller with a wider canopy spread and it will make a good addition to the OVT Register as a representative of this protected species.

<b>BASIS OF NOMINATION:</b> Large Dimension $\geq 1000\text{mm}$ DBH Tree of cultural significance (Fung Shui) Tree of outstanding form				
<b>SPECIES: [native]</b> <i>Celtis sinensis</i> Chinese Hackberry 朴樹				
<b>LOCATION:</b> North District. Former HK Golf Club Old Course. <b>Woodland Tree</b> Northing: 838774.7 Easting: 830253.1				
<b>AGE:</b> Estimated at least 70 years.				
<b>DIMENSIONS:</b> DBH: 1003mm Height: 13.5m Spread: 18.0m				
<b>TREE CONDITION:</b>	<b>Form:</b> Average	<b>Health:</b> Good	<b>Structure:</b> Good	<b>Amenity:</b> High
<b>SPECIAL FEATURES:</b> A large and beautiful old woodland tree with outstanding form in a visually prominent location next to the tee box of sixth hole of Old Course. It provides a valuable contribution to local visual amenity. It also provides ecological value by offering food and habitat for insects, birds, and small animals. As a slope tree, it is observed to lean slightly (~15 degrees) towards northeast however, the root system of the tree is well established with many buttress roots (View 5) and therefore the tree has adapted to leaning. The tree helps to shelter and visually frame the teeing area of the sixth hole (View 6) as well as providing visual screening from the adjacent On Po village and as such it is an integral part of the cultural heritage landscape of the oldest golf course in Asia, which is under consideration for a UNESCO Asia-Pacific Award for Cultural Heritage Conservation. The tree also has some Fung Shui significance as it shades the adjacent grave (G-13) (Views 6 and 8). The tree is designated as a Heritage Tree (HT016) in Prof. CY Jim's "Evaluation and Valuation of Heritage Trees in the HKGC Fanling Site: Old Course" (2020) due to its large size, with a monetary value (in 2020) of HK\$8.7M.				
<b>COMPARISON WITH EXISTING OVTS OF THIS SPECIES ON THE REGISTER:</b> The OVT Register currently contains 3 <i>Celtis sinensis</i> . The DBH of those trees ranges from 1025mm to 1103mm, with heights from 13m to 14m and crown spreads from 18m to 21m. Although the DBH pOVT87 is slightly smaller than those trees it has comparable height and spread with beautiful form and branching habit, high amenity value and high ecological value which are all attributes that will make it a worthy addition to the OVT Register.				
<b>DETAILS OF APPLICANT:</b> Alexander (Sandy) M Duggie Managing Director   URBIS Limited RLA, FHKILA, HKIEIA, HKIQEP, UKLI, BEAM Pro [NB, EB, ND] Tel no: 2802 3333   <a href="mailto:sandy@urbis.com.hk">sandy@urbis.com.hk</a>

pOVT87A - Camphor Tree ( <i>Cinnamomum camphora</i> )				
<b>BASIS OF NOMINATION:</b> Tree of cultural significance (Fung Shui)				
<b>SPECIES: [native]</b> <i>Cinnamomum camphora</i> Camphor Tree 樟				
<b>LOCATION:</b> North District. Former HK Golf Club Old Course. <b>Woodland Tree</b> Northing: 838783.8 Easting: 830252.9				
<b>AGE:</b> Estimated at least 50 years.				
<b>DIMENSIONS:</b> DBH: 770mm Height: 15.5m Spread: 16.0m				
<b>TREE CONDITION:</b>	<b>Form:</b> Average	<b>Health:</b> Good	<b>Structure:</b> Good	<b>Amenity:</b> High
<b>SPECIAL FEATURES:</b> A large and beautiful woodland tree, located within the woodland south of the Old Course grass nursery and behind the tee box of sixth hole of Old Course. It provides a valuable contribution to local visual amenity, cultural and heritage values, functional values and ecological value. The tree has an asymmetric crown most likely due to crowding from adjacent trees, which should not be a problem for pOVT87A given that reaction wood and buttress roots are observed at the trunk base, and a sound root system is observed without surface soil cracks. Together with the adjacent pOVT87 and pOVT87B, the tree also has some Fung Shui significance as it shades the adjacent grave (G-13) (View 4).				
<b>COMPARISON WITH EXISTING OVTS OF THIS SPECIES ON THE REGISTER:</b> The OVT Register currently has 44 <i>Cinnamomum camphora</i> registered as OVTS. The DBH of those trees ranges from 700mm to 3007mm DBH, with heights from 10m to 27m and crown spreads from 13m to 35m. The dimensions of pOVT87A are comparable with those existing OVTS. pOVT87A will be a good addition to the Register as a beautiful individual specimen as well as a tree with some Fung Shui significance.

<b>pOVT88 - Queen Crape Myrtle (<i>Lagerstroemia speciosa</i>)</b>				
<b>BASIS OF NOMINATION:</b> Tree of rare and precious species Tree of cultural significance Tree of outstanding form				
<b>SPECIES: [exotic]</b> <i>Lagerstroemia speciosa</i> Queen Crape Myrtle 大花紫薇				
<b>LOCATION:</b> North District. Former HK Golf Club Old Course. <b>Parkland Tree</b> Northing: 838783.1 Easting: 830167.9				
<b>AGE:</b> Estimated at least 50 years.				
<b>DIMENSIONS:</b> DBH: 470mm Height: 10.0m Spread: 12.0m				
<b>TREE CONDITION:</b>	<b>Form:</b> Good	<b>Health:</b> Good	<b>Structure:</b> Good	<b>Amenity:</b> High
<b>CONSERVATION STATUS:</b>		Scheduled under CAP 96		
<b>SPECIAL FEATURES:</b> A large tree for the species, in a prominent located at the eastern edge of the fifth hole green of the Old Course. An excellent specimen of outstanding form with attractive bark (the usual darker bark of this species is sloughed, revealing the smooth, lighter, more interesting inner bark underneath (View 4)) and very high amenity. It has a sound structure given that formation of tension wood is observed to compensate for the slight leaning of the trunk, and a strong U-notch branch union has been formed (View 6). This tree species is not capable of reaching the extremely large dimension thresholds of OVT criteria. However, this is unquestionably an unusually large, beautiful and highly ornamental individual specimen of this protected species that is worthy of recognition. The tree's location on the left edge of the fifth green (Views 7 & 8) helps to visually frame the hole as well as affecting the playability of wayward tee shots and it is thus an integral part of the cultural heritage landscape of the oldest golf course in Asia, which is under consideration for a UNESCO Asia-Pacific Award for Cultural Heritage Conservation.				
<b>COMPARISON WITH EXISTING OVTS OF THIS SPECIES ON THE REGISTER:</b> The OVT Register currently has no <i>Lagerstroemia speciosa</i> registered as OVTS. It is exceptional for this <i>Lagerstroemia speciosa</i> to reach such a large size, in terms of height, DBH and spread. Therefore it will be an excellent addition to the Register as an individual specimen of outstanding value, as a representative of a species not currently listed on the Register, and as a contributor to this important cultural heritage landscape.				
<b>DETAILS OF APPLICANT:</b> Alexander (Sandy) M Duggie Managing Director   URBIS Limited RLA, FHKILA, HKIEIA, HKIQEP, UKLI, BEAM Pro [NB, EB, ND] Tel no: 2802 3333   <a href="mailto:sandy@urbis.com.hk">sandy@urbis.com.hk</a>

pOVT88 (View 8) - The tree's location on the left edge of the fifth green helps to visually frame the hole as well as affecting the playability of wayward tee shots

<b>pOVT88A – Incense Tree (<i>Aquilaria sinensis</i>)</b>				
<b>BASIS OF NOMINATION:</b> Tree of rare and precious species				
<b>SPECIES: [native]</b> <i>Aquilaria sinensis</i> Incense Tree 土沉香				
<b>LOCATION:</b> North District. Former HK Golf Club Old Course. <b>Woodland Tree</b> Northing: 830177.3 Easting: 838773.6				
<b>AGE:</b> Estimated at least 30 years.				
<b>DIMENSIONS:</b> DBH: 365mm Height: 11m Spread: 7m				
<b>TREE CONDITION:</b>	<b>Form:</b> Average	<b>Health:</b> Good	<b>Structure:</b> Average	<b>Amenity:</b> High
<b>CONSERVATION STATUS:</b>		Protected under Cap 586. Listed as 'Near Threatened' in Rare and Precious Plants of Hong Kong. Listed as 'Vulnerable' in China Plant Red Data Book. Listed as 'Vulnerable' under criteria A2a in IUCN Red List of Threatened Species.		
<b>SPECIAL FEATURES:</b> A tree that is of protected, rare and precious species located in the woodland east of the fifth fairway of the Old Course. It has a codominant trunk but the union is a cup-shaped one in which a branch bark ridge is formed (View 6) which is therefore stronger than a joint with wide-mouth bark inclusion. However as the union is cup-shaped, the union should be monitored periodically to remove excessive water and dirt that may harbour mosquito larvae. The tree has an interesting branch architecture that is not common to the species. As with other Incense trees, this tree is protected under Cap 586, listed as 'Near Threatened' in Rare and Precious Plants of Hong Kong, listed as 'Vulnerable' in the China Plant Red Data Book, and listed as 'Vulnerable' under criteria A2a in the IUCN Red List of Threatened Species.				
<b>COMPARISON WITH EXISTING OVTS OF THIS SPECIES ON THE REGISTER:</b> The OVT Register currently has only 1 <i>Aquilaria sinensis</i> registered as OVT. The dimensions of that tree are 760mm DBH, 12m height, 6m spread. While the DBH of pOVT88A is smaller, it possess comparable height and canopy spread and it will make a good addition to the OVT Register as a representative of this protected species.

<b>pOVT93 - Camphor Tree (<i>Cinnamomum camphora</i>)</b>				
<b>BASIS OF NOMINATION:</b> Tree of outstanding form				
<b>SPECIES: [native]</b> <i>Cinnamomum camphora</i> Camphor Tree 樟				
<b>LOCATION:</b> North District. Former HK Golf Club Old Course. <b>Parkland Tree</b> Northing: 838726.4 Easting: 830163.0				
<b>AGE:</b> Estimated at least 70 years.				
<b>DIMENSIONS:</b> DBH: 960mm Height: 14.0m Spread: 20.0m				
<b>TREE CONDITION:</b>	<b>Form:</b> Good	<b>Health:</b> Good	<b>Structure:</b> Good	<b>Amenity:</b> High
<b>SPECIAL FEATURES:</b> A very large and beautiful old woodland tree of outstanding age, size and form, located between the fifth hole green and the sixth hole fairway of the Old Course. An outstanding old tree providing valuable contributions for landscape amenity, cultural and heritage values, functional values and ecological value. Being situated on a gentle slope, it has a slightly asymmetric crown that may shift its centre of gravity towards the southeast, however the tree has developed numerous buttress roots to strengthen its structure and provide stability (View 4). Being located between the fifth green and the sixth fairway (View 5), the tree provides an important visual contribution to both holes. providing a beautiful backdrop to the fifth green (View 6) and visually framing the sixth hole fairway (Views 7 & 8) whilst also providing shade to the cart path as well as affecting the playability of wayward shots from the sixth tee. As such, it is an integral part of the cultural heritage landscape of the oldest golf course in Asia, which is under consideration for a UNESCO Asia-Pacific Award for Cultural Heritage Conservation.				
<b>COMPARISON WITH EXISTING OVTS OF THIS SPECIES ON THE REGISTER:</b> The OVT Register currently has 44 <i>Cinnamomum camphora</i> registered as OVTS. The DBH of those trees ranges from 700mm to 3007mm DBH, with heights from 10m to 27m and crown spreads from 13m to 35m. The dimensions of pOVT93 are comparable to those existing OVTS. pOVT93 will be an excellent addition to the Register as a magnificent individual specimen as well as a contributor to this important cultural heritage landscape.				
<b>DETAILS OF APPLICANT:</b> Alexander (Sandy) M Duggie Managing Director   URBIS Limited RLA, FHKILA, HKIEIA, HKIQEP, UKLI, BEAM Pro [NB, EB, ND] Tel no: 2802 3333   <a href="mailto:sandy@urbis.com.hk">sandy@urbis.com.hk</a>

pOVT93 (View 7) - The tree's location on the right edge of the sixth fairway provides shade to the cart path and helps to visually frame the hole, as well as affecting the playability of wayward tee shots

<b>pOVT94 - Chinese Banyan (<i>Ficus microcarpa</i>)</b>				
<b>BASIS OF NOMINATION:</b> Large Dimension $\geq 1000\text{mm}$ DBH Large Dimension $\geq 25\text{m}$ crown spread Tree of cultural significance Tree of outstanding form				
<b>SPECIES: [native]</b> <i>Ficus microcarpa</i> Chinese Banyan 榕樹				
<b>LOCATION:</b> North District. Former HK Golf Club Old Course. <b>Parkland Tree</b> Northing: 838775.2 Easting: 830103.0				
<b>AGE:</b> Estimated at least 70 years.				
<b>DIMENSIONS:</b> DBH: 1300mm Height: 16.0m Spread: 28.0m				
<b>TREE CONDITION:</b>	<b>Form:</b> Good	<b>Health:</b> Good	<b>Structure:</b> Good	<b>Amenity:</b> High
<b>SPECIAL FEATURES:</b> A very large and magnificent parkland tree of outstanding age, form and structure, located west of the fifth hole green of the Old Course. The tree has an exceptionally wide crown with numerous branches forming an excellent branch architecture. Also numerous aerial roots are found weeping from the tree, many of which have reached the soil and are thickening. This process is being encouraged by the tree maintenance staff who allow groundcover to grow below the tree crown, which appears effective in preventing human disruption of the aerial rooting area. Staff also use bamboo sticks to guide the roots to reach the ground (View 8). pOVT94 provides a valuable contribution to local visual amenity and provides ecological value by offering food and habitat for insects, birds and small animals. Being located to the right of the fifth green (View 9) it contributes to the visual framing of the hole as well as affecting the playability of wayward shots from the tee. As such, it is an integral part of the cultural heritage landscape of the oldest golf course in Asia, which is under consideration for a UNESCO Asia-Pacific Award for Cultural Heritage Conservation. The tree is designated as a Heritage Tree (HT013) in Prof. CY Jim's " <i>Evaluation and Valuation of Heritage Trees in the HKGC Fanling Site: Old Course</i> " (2020) due to its large size, with a monetary value (in 2020) of HK\$9.3M.				
<b>COMPARISON WITH EXISTING OVTS OF THIS SPECIES ON THE REGISTER:</b> The OVT Register currently has 221 <i>Ficus microcarpa</i> registered as OVTS. The DBH of those <i>Ficus microcarpa</i> ranges widely from 568mm to 7710mm, with heights from 8m to 30m and crown spreads from 7m to 41m. The dimensions of pOVT94 are comparable with those OVTS. Furthermore, the magnificent form and architecture of the tree, the large number of aerial roots, as well as its contribution to this important cultural heritage landscape, will make pOVT94 a marvellous addition to the Register.

<b>pOVT95 – Kassod Tree (<i>Senna siamea</i>)</b>				
<b>BASIS OF NOMINATION:</b> Large Dimension ≥1000mm DBH Tree of cultural significance				
<b>SPECIES: [exotic]</b> <i>Senna siamea</i> Kassod Tree 鐵刀木				
<b>LOCATION:</b> North District. Former HK Golf Club Old Course. <b>Woodland Tree</b> Northing: 838803.0 Easting: 830118.6				
<b>AGE:</b> Estimated at least 50 years.				
<b>DIMENSIONS:</b> DBH: 1000mm Height: 19.0m Spread: 14.0m				
<b>TREE CONDITION:</b>	<b>Form:</b> Average	<b>Health:</b> Good	<b>Structure:</b> Average	<b>Amenity:</b> High
<b>SPECIAL FEATURES:</b> A very large and mature woodland tree located along the western edge of fifth hole fairway of the Old Course. The tree is the tallest amongst the copse of surrounding trees. The tree, having two main trunks with union near the ground, appears to have suffered from trunk failure at several locations, creating wounds where epicormics have sprouted. However, the tree appears to be thriving with sufficient foliage on top. Careful treatment to this tree is necessary to keep this large tree in the best condition. As the tallest tree in the copse of trees on the right edge of the fifth hole fairway (View 5), it provides an important contribution to the visual framing of the hole. As such, it is an integral part of the cultural heritage landscape of the oldest golf course in Asia, which is under consideration for a UNESCO Asia-Pacific Award for Cultural Heritage Conservation.				
<b>COMPARISON WITH EXISTING OVTS OF THIS SPECIES ON THE REGISTER:</b> The OVT Register currently has only one <i>Senna siamea</i> registered as OVT, with 1800mm DBH, 28m height and 25m spread. Although pOVT95 is smaller than this OVT, the tree register may not reflect the case that <i>Senna siamea</i> is widely cultivated in Hong Kong. pOVT95 will be a worthwhile addition to the Register.

**pOVT97 - Paper-bark Tree (*Melaleuca cajuputi* subsp. *cumingiana*)**

**BASIS OF NOMINATION:**

Tree of cultural significance  
Tree of outstanding form

**SPECIES: [exotic]**

*Melaleuca cajuputi* subsp. *cumingiana*  
Paper-bark Tree  
白千層

**LOCATION:**

North District.  
Former HK Golf Club Old Course.

**Woodland Tree**

Northing: 838648.0  
Easting: 830181.3

**AGE:** Estimated at least 70 years.

**DIMENSIONS:** DBH: 975mm  
Height: 23.0m  
Spread: 10.0m

**TREE CONDITION:**

**Form:** Good

**Health:** Good

**Structure:** Average

**Amenity:** High

**SPECIAL FEATURES:**

A very large and old woodland tree of outstanding form and structure located on the eastern edge of the sixth hole fairway of the Old Course. One of numerous very large and mature potential OVTs identified in the Paper-bark woodland located along the eastern boundary of the Old Course, stretching 400m long from north to south and containing an estimated 500 Paper-bark tree individuals.

The tree is slightly leaning (less than 15°) with the upper canopy shape indicating self-correction indicative of long-term tree stability. The tree displays an interesting helical bark feature as a result of the phenomenon called spiral grain, which acts to distribute water absorbed from one root to all branches, and food produced from leaves of one branch to all roots, when root and/or tree crown is asymmetric or water is only available at part of the root crown.

Trees with spiral grain are also more resistant to damage from strong wind. Spiral grain is important for pOVT97 to thrive given the tree is located on the woodland edge with competition for resources from other woodland trees and shrubs.

As part of the Paper-bark woodland lining the left edge of the sixth hole fairway, the tree plays an important role in the visual framing of the hole as well as penalising wayward shots from the sixth tee (Views 5 to 8). As such, it is an integral part of the cultural heritage landscape of the oldest golf course in Asia, which is under consideration for a UNESCO Asia-Pacific Award for Cultural Heritage Conservation.

**COMPARISON WITH EXISTING OVTS OF THIS SPECIES ON THE REGISTER:**

The OVT Register currently has 12 *Melaleuca cajuputi* subsp. *cumingiana* registered as OVTs. The DBH of those *Melaleuca cajuputi* subsp. *cumingiana* ranges from 700mm to 1565mm, with heights from 9m to 21m and crown spreads from 6m to 13m. The DBH and spread of pOVT97 are comparable with those existing OVTs, however it is taller than them. pOVT97 will be a good addition to the Register as an individual specimen as well as being a contributor to this important cultural heritage landscape.

<b>TREE CONDITION:</b>	<b>Form:</b> Average	<b>Health:</b> Good	<b>Structure:</b> Good	<b>Amenity:</b> High
<b>SPECIAL FEATURES:</b> A very large and old woodland tree located on the eastern edge of the sixth hole fairway of the Old Course. One of numerous very large and mature potential OVTs identified in the Paper-bark woodland located along the eastern boundary of the Old Course, stretching 400m long from north to south and containing an estimated 500 Paper-bark tree individuals. The tree displays an interesting helical bark feature as a result of the phenomenon called spiral grain, which acts to distribute water absorbed from one root to all branches, and food produced from leaves of one branch to all roots, when root and/or tree crown is asymmetric or water is only available at part of the root crown. Trees with spiral grain are also more resistant to breaking caused by strong wind. Spiral grain is important for pOVT100 to thrive given the tree is located on the woodland edge with competition of resources from other woodland trees and shrubs. As part of the Paper-bark woodland lining the left edge of the sixth hole fairway, the tree plays an important role in the visual framing of the hole as well as penalising wayward shots from the sixth tee (Views 5 to 7). As such, it is an integral part of the cultural heritage landscape of the oldest golf course in Asia, which is under consideration for a UNESCO Asia-Pacific Award for Cultural Heritage Conservation.				
<b>COMPARISON WITH EXISTING OVTS OF THIS SPECIES ON THE REGISTER:</b> The OVT Register currently has 12 <i>Melaleuca cajuputi</i> subsp. <i>cumingiana</i> registered as OVTs. The DBH of those <i>Melaleuca cajuputi</i> subsp. <i>cumingiana</i> ranges from 700mm to 1565mm, with heights from 9m to 21m and crown spreads from 6m to 13m. The dimensions of pOVT100 are comparable with those existing OVTs, including a huge DBH comparable with the largest in the Register. pOVT100 will be a good addition to the Register as an individual specimen as well as being a contributor to this important cultural heritage landscape.				
<b>DETAILS OF APPLICANT:</b> Alexander (Sandy) M Duggie Managing Director   URBIS Limited RLA, FHKILA, HKIEIA, HKIQEP, UKLI, BEAM Pro [NB, EB, ND] Tel no: 2802 3333   <a href="mailto:sandy@urbis.com.hk">sandy@urbis.com.hk</a>

<b>pOVT102 - Flame Tree (<i>Delonix regia</i>)</b>				
<b>BASIS OF NOMINATION:</b> Tree of cultural significance Tree of outstanding form				
<b>SPECIES: [exotic]</b> <i>Delonix regia</i> Flame Tree 鳳凰木				
<b>LOCATION:</b> North District. Former HK Golf Club Old Course. <b>Parkland Tree</b> Northing: 838566.0 Easting: 830109.5				
<b>AGE:</b> Estimated at least 50 years.				
<b>DIMENSIONS:</b> DBH: 610mm Height: 14.5m Spread: 19.0m				
<b>TREE CONDITION:</b>	<b>Form:</b> Good	<b>Health:</b> Good	<b>Structure:</b> Average	<b>Amenity:</b> High
<b>SPECIAL FEATURES:</b> A large and beautiful parkland tree of outstanding size and form, located in a group of 5 Flame trees on the east edge the sixth hole fairway of the Old Course. Its position on the edge of the group, with its canopy spreading out over the fairway, gives it visual prominence in the landscape. An outstanding tree providing valuable contributions for landscape amenity, cultural and heritage values, functional values and ecological value. The tree trunk is leaning with reaction wood and buttress formed, and the fact that the tree is not located in confined planter make the tree likely to bear extensive roots to stabilize the tree. Together with the adjacent Flame trees pOVT103 and 104, it creates a huge composite tree canopy that is very beautiful and distinctive in the landscape, especially during the flowering season. Located at a gentle 'dogleg' of the fairway, pOVT102, pOVT103 and pOVT104 together play an important role in the visual framing of the hole as well as affecting the playability of wayward shots from the sixth tee and fairway (Views 5 & 6). As such, it is an integral part of the cultural heritage landscape of the oldest golf course in Asia, which is under consideration for a UNESCO Asia-Pacific Award for Cultural Heritage Conservation.				
<b>COMPARISON WITH EXISTING OVTS OF THIS SPECIES ON THE REGISTER:</b> The OVT Register currently contains no specimen of <i>Delonix regia</i> . This does not reflect the fact that <i>Delonix regia</i> is widely cultivated in Hong Kong with many specimens reaching large and mature size with outstanding form (although many are on leased land). pOVT102 will thus be an excellent addition to the Register as an outstanding individual specimen, as a representative of a species not currently on the Register as well as being a key component of this important cultural heritage landscape.				
<b>DETAILS OF APPLICANT:</b> Alexander (Sandy) M Duggie Managing Director   URBIS Limited RLA, FHKILA, HKIEIA, HKIQEP, UKLI, BEAM Pro [NB, EB, ND] Tel no: 2802 3333   <a href="mailto:sandy@urbis.com.hk">sandy@urbis.com.hk</a>

pOVT115 (View 5) - The tree's location within the tall Paper-bark woodland stretching along the left edge of the sixth fairway provides strong visual framing of the hole and screens the adjacent property, as well as penalising wayward second shots from the sixth fairway on this par 5 hole.

pOVT115 (View 6) - The tree's location within the tall Paper-bark woodland stretching along the left edge of the sixth fairway provides strong visual framing of the hole and screens the adjacent property, as well as penalising wayward second shots from the sixth fairway on this par 5 hole.

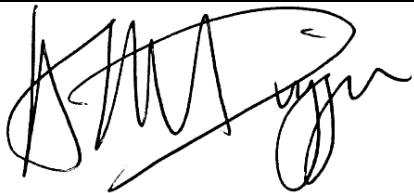

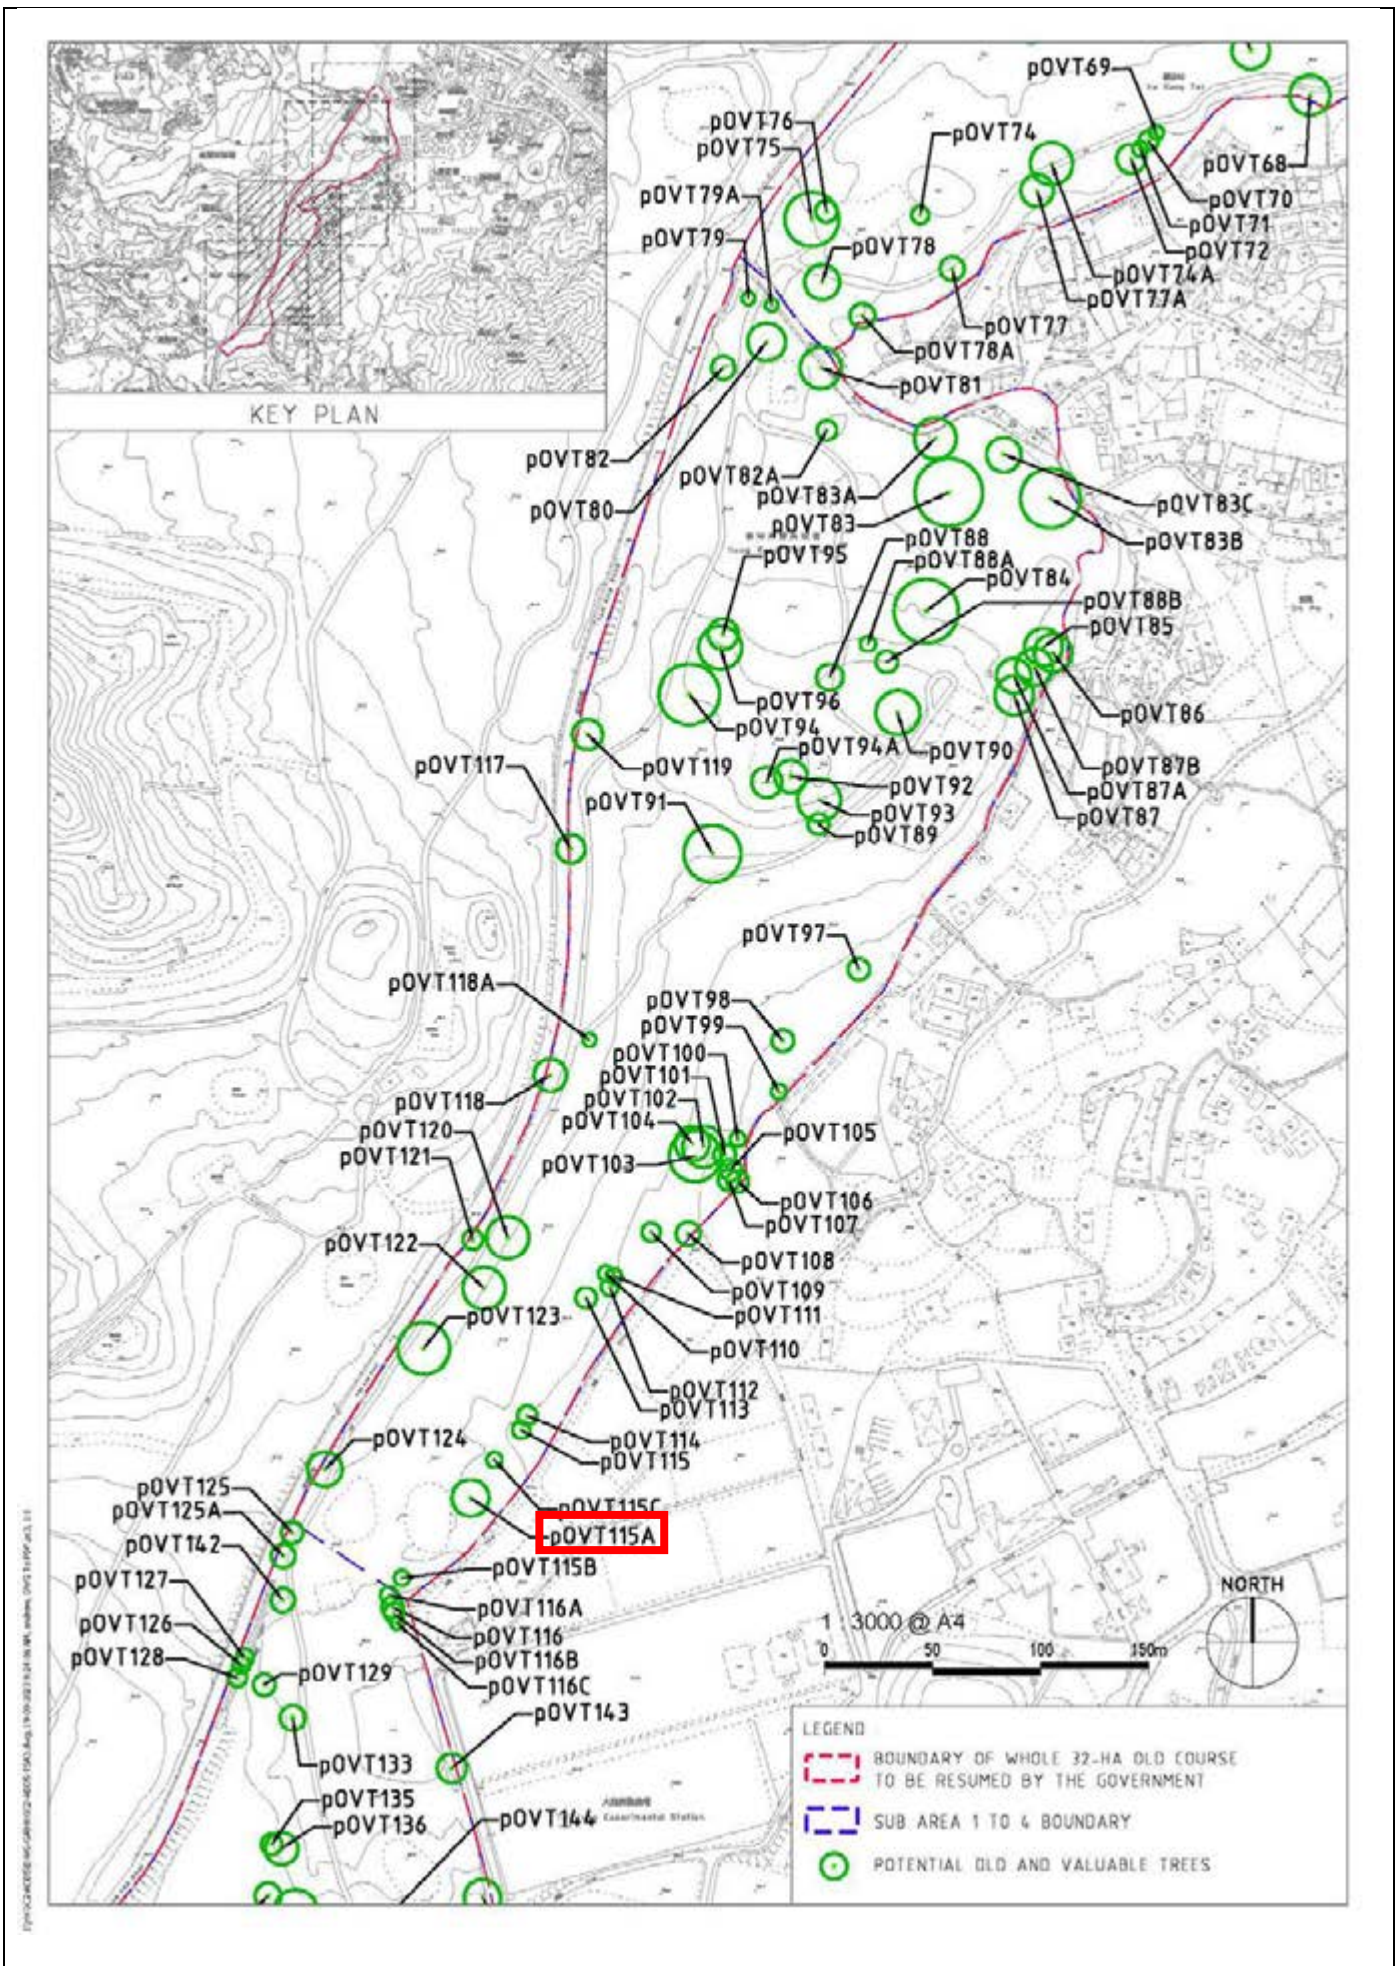

pOVT115 (View 7) - The tree's location within the tall Paper-bark woodland stretching along the left edge of the sixth fairway provides strong visual framing of the hole and screens the adjacent property, as well as penalising wayward second shots from the sixth fairway on this par 5 hole.

pOVT115 (View 8) - The tree's location within the tall Paper-bark woodland stretching along the left edge of the sixth fairway provides strong visual framing of the hole and screens the adjacent property, as well as penalising wayward second shots from the sixth fairway on this par 5 hole.

<b>pOVT115A - Paper-bark Tree (<i>Melaleuca cajuputi</i> subsp. <i>cumingiana</i>)</b>				
<b>BASIS OF NOMINATION:</b> Tree of cultural significance Tree of outstanding form				
<b>SPECIES: [exotic]</b> <i>Melaleuca cajuputi</i> subsp. <i>cumingiana</i> Paper-bark Tree 白千層				
<b>LOCATION:</b> North District. Former HK Golf Club Old Course. <b>Woodland Tree</b> Northing: 838403.6 Easting: 830001.9				
<b>AGE:</b> Estimated at least 70 years.				
<b>DIMENSIONS:</b> DBH: 970mm Height: 20.0m Spread: 17.0m				
<b>TREE CONDITION:</b>	<b>Form:</b> Good	<b>Health:</b> Good	<b>Structure:</b> Good	<b>Amenity:</b> High
<b>SPECIAL FEATURES:</b> A very tall and stately old woodland tree of outstanding form and structure located on the eastern edge of the sixth hole green of the Old Course. One of numerous very large and mature potential OVTs identified in the Paper-bark woodland located along the eastern boundary of the Old Course, stretching 400m long from north to south and containing an estimated 500 Paper-bark tree individuals. pOVT115A, 115B and 115C are the tallest trees in this section of the Paper-bark woodland, near the sixth green. pOVT115A is starting to be strangled by a specimen of <i>Ficus microcarpa</i> which is visible half-way up the tree trunk (View 5) which creates an interesting visual effect. As part of the Paper-bark woodland lining the left edge of the sixth hole fairway, the tree plays an important role in the visual framing of the hole as well as penalising wayward approach shots to the green from the sixth fairway (Views 7 & 8). As such, it is an integral part of the cultural heritage landscape of the oldest golf course in Asia, which is under consideration for a UNESCO Asia-Pacific Award for Cultural Heritage Conservation.				
<b>COMPARISON WITH EXISTING OVTS OF THIS SPECIES ON THE REGISTER:</b> The OVT Register currently has 12 <i>Melaleuca cajuputi</i> subsp. <i>cumingiana</i> registered as OVTs. The DBH of those <i>Melaleuca cajuputi</i> subsp. <i>cumingiana</i> ranges from 700mm to 1565mm, with heights from 9m to 21m and crown spreads from 6m to 13m. The DBH and height of pOVT115A are comparable with those existing OVTs however it has a larger canopy spread. It will be an excellent addition to the Register as an individual specimen as well as being a contributor to this important cultural heritage landscape.				
<b>DETAILS OF APPLICANT:</b> Alexander (Sandy) M Duggie Managing Director   URBIS Limited RLA, FHKILA, HKIEIA, HKIQEP, UKLI, BEAM Pro [NB, EB, ND] Tel no: 2802 3333   <a href="mailto:sandy@urbis.com.hk">sandy@urbis.com.hk</a>

pOVT115C (View 6) The tree's location within the tall Paper-bark woodland stretching along the left edge of the sixth fairway provides strong visual framing of the hole and screens the adjacent property, as well as penalising wayward second shots from the sixth fairway on this par 5 hole.

<b>pOVT117 - Paper-bark Tree (<i>Melaleuca cajuputi</i> subsp. <i>cumingiana</i>)</b>				
<b>BASIS OF NOMINATION:</b> Large Dimension ≥1000mm DBH Tree of outstanding form				
<b>SPECIES: [exotic]</b> <i>Melaleuca cajuputi</i> subsp. <i>cumingiana</i> Paper-bark Tree 白千層				
<b>LOCATION:</b> North District. Former HK Golf Club Old Course, along Fan Kam Road. <b>Roadside Tree</b> Northing: 838703.7 Easting: 830048.3				
<b>AGE:</b> Estimated at least 70 years.				
<b>DIMENSIONS:</b> DBH: 1000mm Height: 16.5m Spread: 13.0m				
<b>TREE CONDITION:</b>	<b>Form:</b> Good	<b>Health:</b> Good	<b>Structure:</b> Good	<b>Amenity:</b> High
<b>SPECIAL FEATURES:</b> A very large and beautiful old roadside tree forming part of a long avenue of tall trees along Fan Kam Road. An unusual specimen of the species, with a multi-stem structure that is uncommon, it provides a valuable contribution to local visual amenity, as well as providing cultural heritage value as it is representative of the many avenues of paper-bark trees that once lined the major trunk roads in the New Territories, most of which have been lost due to numerous road-widening schemes in recent years. The tree displays an interesting helical bark feature as a result of the phenomenon called spiral grain (View 4), which acts to distribute water absorbed from one root to all branches, and food produced from leaves of one branch to all roots, when root and/or tree crown is asymmetric or water is only available at part of the root crown. Trees with spiral grain are also more resistant to damage from strong wind. Spiral grain is important for pOVT117 to thrive given half of the root crown of the tree is bound by road curb, limiting supply of water and nutrients.				
<b>COMPARISON WITH EXISTING OVTS OF THIS SPECIES ON THE REGISTER:</b> The OVT Register currently has 12 <i>Melaleuca cajuputi</i> subsp. <i>cumingiana</i> registered as OVTS. The DBH of those <i>Melaleuca cajuputi</i> subsp. <i>cumingiana</i> ranges from 700mm to 1565mm, with heights from 9m to 21m and crown spreads from 6m to 13m. The dimensions of pOVT117 are comparable with those OVTS. It will be an excellent addition to the Register.

<b>pOVT118A – Incense Tree (<i>Aquilaria sinensis</i>)</b>				
<b>BASIS OF NOMINATION:</b> Tree of rare and precious species				
<b>SPECIES: [native]</b> <i>Aquilaria sinensis</i> Incense Tree 土沉香				
<b>LOCATION:</b> North District. Former HK Golf Club Old Course. <b>Parkland Tree</b> Northing: 830056.9 Easting: 838615.4				
<b>AGE:</b> Estimated at least 30 years.				
<b>DIMENSIONS:</b> DBH: 330mm Height: 12m Spread: 6m				
<b>TREE CONDITION:</b>	<b>Form:</b> Average	<b>Health:</b> Average	<b>Structure:</b> Good	<b>Amenity:</b> High
<b>CONSERVATION STATUS:</b>		Protected under Cap 586. Listed as 'Near Threatened' in Rare and Precious Plants of Hong Kong. Listed as 'Vulnerable' in China Plant Red Data Book. Listed as 'Vulnerable' under criteria A2a in IUCN Red List of Threatened Species.		
<b>SPECIAL FEATURES:</b> A tree that is of protected, rare and precious species located along the western edge of the fairway of the sixth hole of the Old Course. Epicormics are found sprouting at the wound of a codominant branch that has been removed, and several wounds are found along the remaining codominant trunks indicating the tree is under some health stress, and therefore monitoring of its health is necessary in the long term (Views 4 & 5). The tree has an asymmetric crown, most likely as a result of the removed codominant branch and presence of adjacent large trees (View 2). The union of the remaining codominant branches is found to be cup-shaped in which a branch bark ridge is formed (View 6) which is therefore stronger than a joint with wide-mouth bark inclusion. However as the union is cup-shaped, the union should be monitored periodically to remove excessive water and dirt that may harbour mosquito larvae. As with other Incense trees, this tree is protected under Cap 586, listed as 'Near Threatened' in Rare and Precious Plants of Hong Kong, listed as 'Vulnerable' in the China Plant Red Data Book, and listed as 'Vulnerable' under criteria A2a in the IUCN Red List of Threatened Species. The tree is designated as a Heritage Tree (HT014) in Prof. CY Jim's "Evaluation and Valuation of Heritage Trees in the HKGC Fanling Site: Old Course" (2020) due to its protected status, with a monetary value (in 2020) of HK\$7.3M.				
<b>COMPARISON WITH EXISTING OVTS OF THIS SPECIES ON THE REGISTER:</b> The OVT Register currently has only 1 <i>Aquilaria sinensis</i> registered as OVT. The dimensions of that tree are 760mm DBH, 12m height, 6m spread. While the DBH of pOVT118A is smaller, it has comparable height and canopy spread and it will make a good addition to the OVT Register as a representative of this protected species.

Located along the edge of Fan Kam Road and close to the right edge of the sixth fairway, pOVT121 forms part of the long line of very tall trees along Fan Kam Road that beautifully frame and visually enclose the sixth hole (Views along the edge of Fan Kam Road and close to the right edge of the sixth fairway, pOVT121 forms part of the long line of very tall trees along Fan Kam Road that beautifully frame and visually enclose the sixth hole 4 & 5). As such, it is an integral part of the cultural heritage landscape of the oldest golf course in Asia, which is under consideration for a UNESCO Asia-Pacific Award for Cultural Heritage Conservation.				
<b>COMPARISON WITH EXISTING OVTS OF THIS SPECIES ON THE REGISTER:</b> The OVT Register currently has 12 <i>Melaleuca cajuputi</i> subsp. <i>cumingiana</i> registered as OVTS. The DBH of those <i>Melaleuca cajuputi</i> subsp. <i>cumingiana</i> ranges from 700mm to 1565mm, with heights from 9m to 21m and crown spreads from 6m to 13m. The dimensions of pOVT121 are comparable with those OVTS. It will be an excellent addition to the Register as an outstanding individual specimen as well as being a key component of this important cultural heritage landscape.				
<b>DETAILS OF APPLICANT:</b> Alexander (Sandy) M Duggie Managing Director   URBIS Limited RLA, FHKILA, HKIEIA, HKIQEP, UKLI, BEAM Pro [NB, EB, ND] Tel no: 2802 3333   <a href="mailto:sandy@urbis.com.hk">sandy@urbis.com.hk</a>

pOVT121 (View 3)

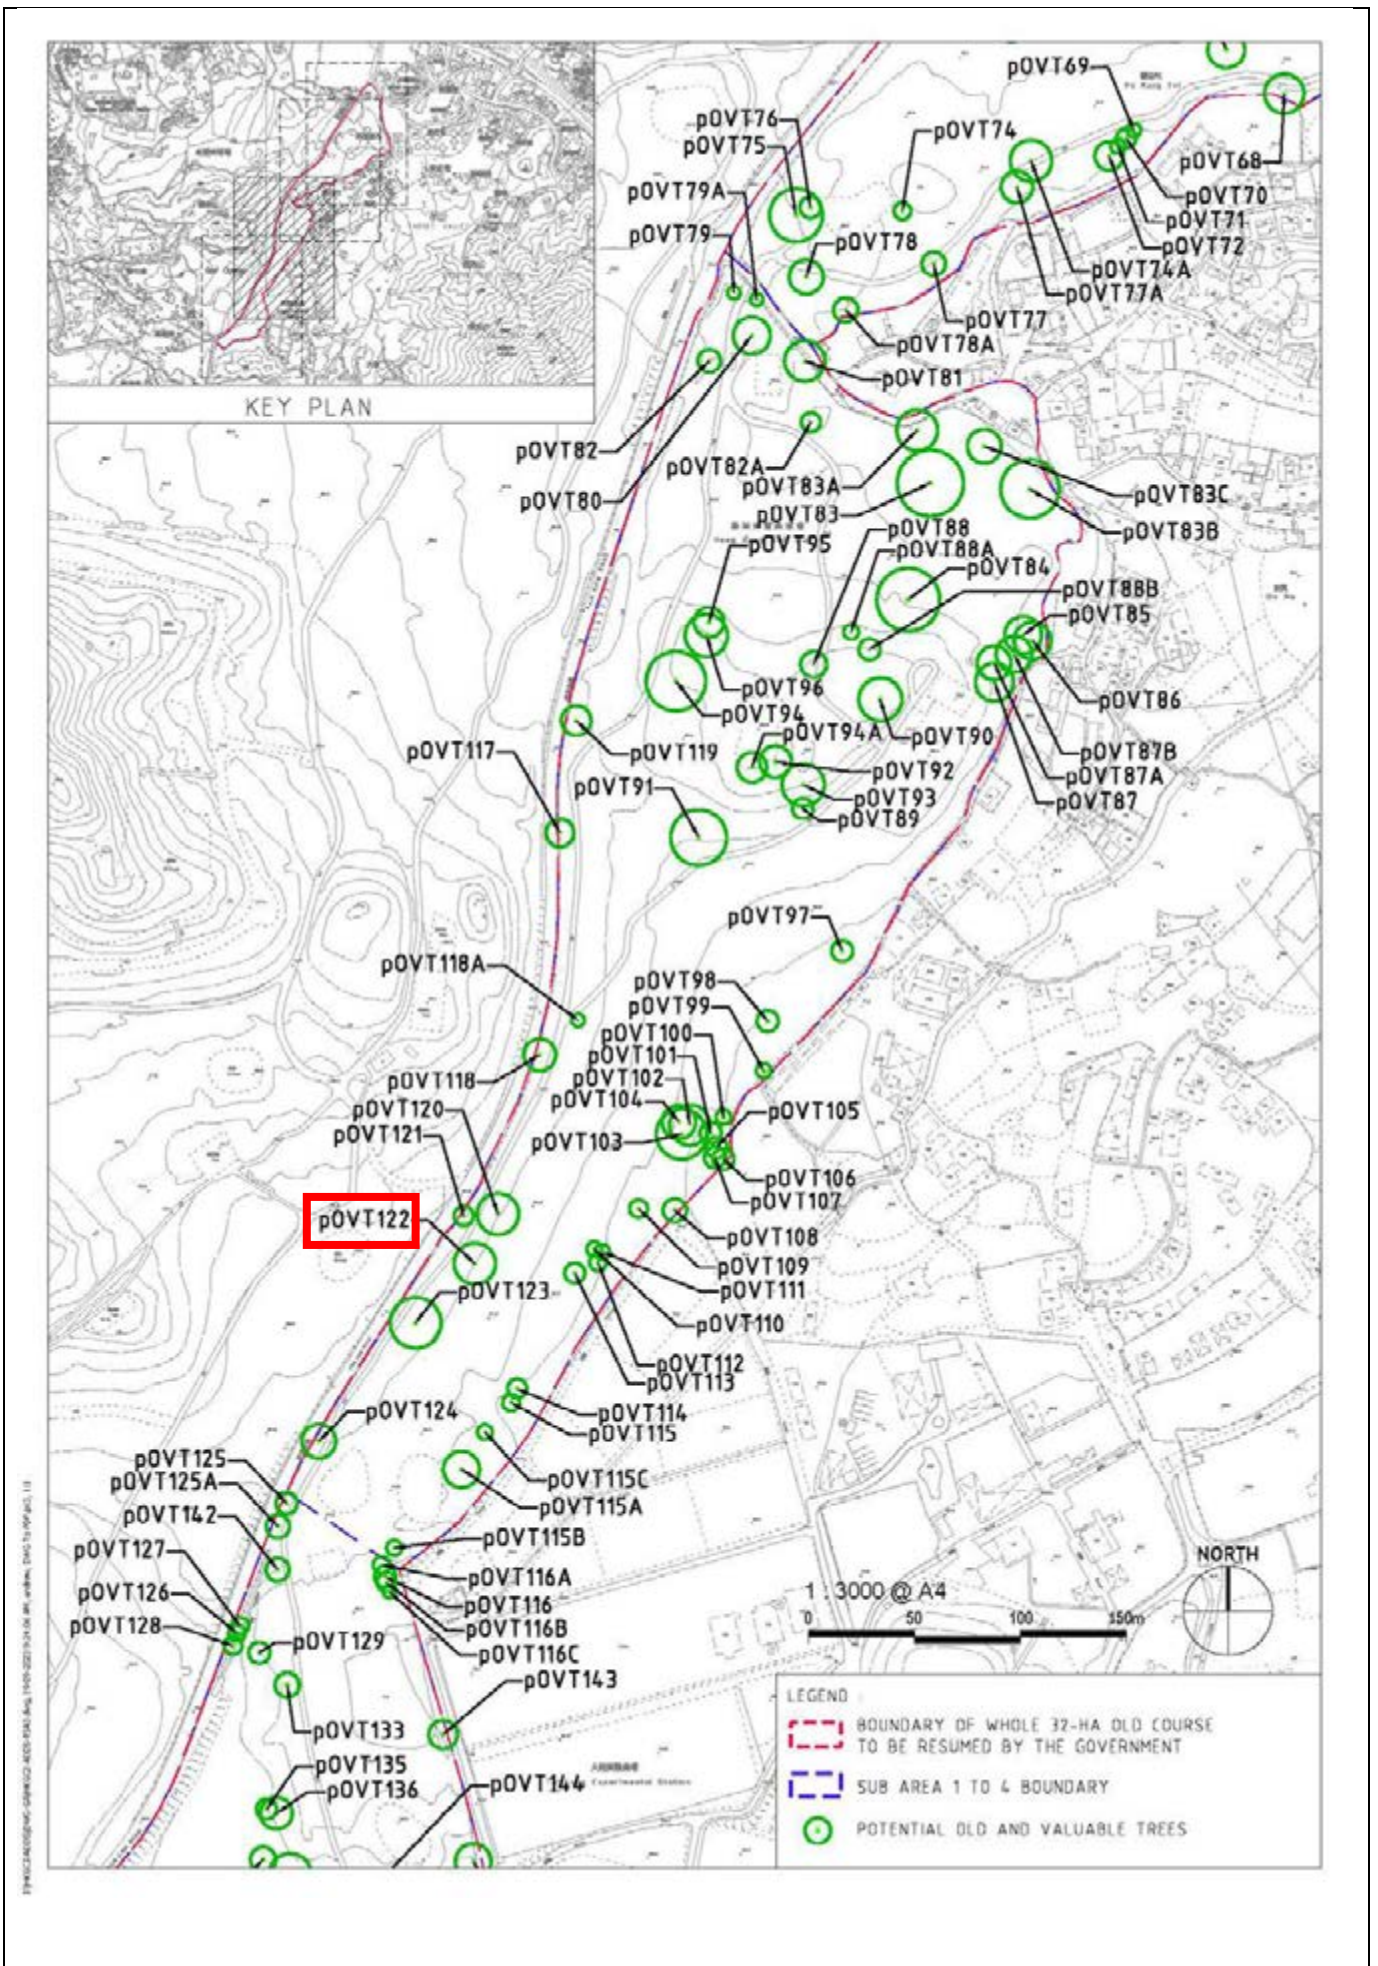

pOVT121 (View 4) - Located along the edge of Fan Kam Road and close to the right edge of the sixth fairway, pOVT121 forms part of the long line of very tall trees along Fan Kam Road that beautifully frame and visually enclose the sixth hole.

pOVT121 (View 5) - Located along the edge of Fan Kam Road and close to the right edge of the sixth fairway, pOVT121 forms part of the long line of very tall trees along Fan Kam Road that beautifully frame and visually enclose the sixth hole.

pOVT122 – Big-leaved Fig ( <i>Ficus virens</i> )				
<b>BASIS OF NOMINATION:</b> Tree of cultural significance Tree of outstanding form				
<b>SPECIES: [native]</b> <i>Ficus virens</i> Big-leaved Fig 大葉榕				
<b>LOCATION:</b> North District. Former HK Golf Club Old Course. <b>Parkland Tree</b> Northing: 838500.6 Easting: 830008.2				
<b>AGE:</b> Estimated at least 70 years.				
<b>DIMENSIONS:</b> DBH: 880mm Height: 13.0m Spread: 20.0m				
<b>TREE CONDITION:</b>	<b>Form:</b> Good	<b>Health:</b> Good	<b>Structure:</b> Good	<b>Amenity:</b> High
<b>SPECIAL FEATURES:</b> A very large and mature parkland tree located on the western edge of the sixth hole fairway of the Old Course, where it is a prominent feature affecting the playability of the hole and providing a valuable contribution to visual amenity. It also provides ecological value by offering food and habitat for insects, birds, and small animals. Located on the right edge of the sixth hole fairway, pOVT120 forms part of the long line of trees that beautifully frame and visually enclose the sixth hole (Views 4 to 6). It also affects the playability of wayward second shots on this long par 5 hole. As such, it is an integral part of the cultural heritage landscape of the oldest golf course in Asia, which is under consideration for a UNESCO Asia-Pacific Award for Cultural Heritage Conservation.				
<b>COMPARISON WITH EXISTING OVTS OF THIS SPECIES ON THE REGISTER:</b> The Tree Register currently has 30 <i>Ficus virens</i> registered as OVTS. The DBH of those trees ranges from 990mm to 2710mm, with heights from 10m to 25m and crown spreads from 10m to 35m. Although pOVT122 has a slightly smaller DBH than those OVTS, it has comparable height and canopy spread. pOVT122 will make an excellent addition to the Register due to its outstanding form and its valuable contribution to this important cultural heritage landscape.

pOVT123 (View 5) - Located on the right edge of the sixth hole fairway, pOVT123 forms part of the long line of trees that beautifully frame and visually enclose the sixth hole. It also affects the playability of wayward second shots on this long par 5 hole.

pOVT123 (View 6) - Located on the right edge of the sixth hole fairway, pOVT123 forms part of the long line of trees that beautifully frame and visually enclose the sixth hole. It also affects the playability of wayward second shots on this long par 5 hole.

pOVT123 (View 7) - Located on the right edge of the sixth hole fairway, pOVT123 forms part of the long line of trees that beautifully frame and visually enclose the sixth hole. It also affects the playability of wayward second shots on this long par 5 hole.

pOVT123 (View 8) - Located on the right edge of the sixth hole fairway, pOVT123 forms part of the long line of trees that beautifully frame and visually enclose the sixth hole. It also affects the playability of wayward second shots on this long par 5 hole. This view looks back along the sixth fairway from near the sixth green.

<p><b>pOVT124 - Paper-bark Tree (<i>Melaleuca cajuputi</i> subsp. <i>cumingiana</i>)</b></p>				
<p><b>BASIS OF NOMINATION:</b>                  Large Dimension ≥1000mm DBH                  Tree of cultural significance                  Tree of outstanding form</p>				
<p><b>SPECIES: [exotic]</b>  <i>Melaleuca cajuputi</i> subsp. <i>cumingiana</i>                  Paper-bark Tree                  白千層</p>				
<p><b>LOCATION:</b>                  North District.                  Former HK Golf Club Old Course, along                  Fan Kam Road.  <b>Roadside Tree</b>                  Northing: 838416.9                  Easting: 829934.7</p>				
<p><b>AGE:</b> Estimated at least 70 years.</p>				
<p><b>DIMENSIONS:</b> DBH: 1162mm                  Height: 18.5m                  Spread: 16.0m</p>				
<p><b>TREE CONDITION:</b></p>	<p><b>Form:</b> Good</p>	<p><b>Health:</b> Good</p>	<p><b>Structure:</b> Good</p>	<p><b>Amenity:</b> High</p>
<p><b>SPECIAL FEATURES:</b>                  A very large and beautiful old roadside tree forming part of a long avenue of tall trees along Fan Kam Road. An unusual specimen of the species, with a multi-stem structure that is uncommon, it provides a valuable contribution to local visual amenity, as well as providing cultural heritage value as it is representative of the many avenues of Paper-bark trees that once lined the major trunk roads in the New Territories, most of which have been lost due to numerous road-widening schemes in recent years.                  Located along the edge of Fan Kam Road and close to the right edge of the sixth fairway near the sixth green, pOVT124 forms part of the long line of very tall trees along Fan Kam Road that beautifully frame and visually enclose the sixth hole (View 5). As such, it is an integral part of the cultural heritage landscape of the oldest golf course in Asia, which is under consideration for a UNESCO Asia-Pacific Award for Cultural Heritage Conservation.</p>				
<p><b>COMPARISON WITH EXISTING OVTS OF THIS SPECIES ON THE REGISTER:</b>                  The OVT Register currently has 12 <i>Melaleuca cajuputi</i> subsp. <i>cumingiana</i> registered as OVTs. The DBH of those <i>Melaleuca cajuputi</i> subsp. <i>cumingiana</i> ranges from 700mm to 1565mm, with heights from 9m to 21m and crown spreads from 6m to 13m. The DBH and height of pOVT124 are comparable with those OVTs however it has a wider canopy spread. It will be an excellent addition to the Register as an outstanding individual specimen as well as being a key component of this important cultural heritage landscape.</p>
